Percentage changes reflect data from July 2023 compared to July 2022

Accommodation indicators for Darwin for the month of July 2023 were mixed for the hotel accommodation sector and for the short term letting sector when compared to July 2022. Supply was higher in both markets, increasing +6.2% to 174,000 room nights for hotels, and +47% to 21,000 listing nights for short term letting. An additional 330 rooms came online when comparing July 2023 to the same period last year due to the addition of Darwin Waterfront Short Stay Apartments and Ibis Airport to the Darwin hotel accommodation market. In addition to this, Mercure Airport Resort and Oaks Darwin Elan Hotel added more rooms into circulation. Hotel demand decreased by -5.1% to 130,000 room nights, while short term letting demand increased by +24% to 15,000 listing nights.

The occupancy rates in both sectors experienced a drop which can be partially attributed to the increase in supply. The occupancy rate for the hotel sector was down -8.9 percentage points (pp) to 75%, and decreased by -13pp to 71% for the short term letting sector. The average daily rate was lower for the hotel sector in July 2023, down -13% (or -\$38.70) to \$255. Meanwhile, the surge in short term letting supply possibly also contributed to a drop in average daily rate compared to the same month last year, down -21% (or -\$65.80) to \$247. Revenue per available room (RevPAR) figures were lower for both the hotel sector at \$191 (down -22% or -\$54.80) and the short term letting sector at \$174 (down -34% or -\$87.80).

The year ending (YE) July 2023 room occupancy rate for the hotel sector was marginally lower down -0.4pp at 58% compared to July 2022. This was due to an increase in demand, up +7.2% (to 1,144,000 room nights). Hotel supply rose +8.8% (to 1,977,000 room nights) over the same period. The yearly listing occupancy rate for the short term letting sector was down -2.4pp to 58%, with a +38% increase in demand and a +48% increase in supply.

Darwin Monthly Accommodation Report

July 2023

The average daily rate and RevPAR for the YE July 2023 for the hotel sector were \$199 (up +5.1% or +\$9.60) and \$122 (up +3.9% or +\$4.60) respectively, as compared to the YE July 2022. Conversely, the average daily rate and RevPAR for the YE July 2023 for short term letting were at \$203 (down -3.0% or -\$6.40) and \$124 (down -6.4% or -\$8.50) respectively, as compared to the YE July 2022.

The short term letting sector in Darwin has grown significantly with +129% growth (from 393 to 900 listed properties) between July 2020 to July 2023.

The hotel sector occupancy rate in July 2023 was higher than in July 2020 and 2021 and lower than in July 2022. When compared to pre-pandemic levels in July 2019, the July 2023 occupancy rate was slightly lower.

DARWIN MONTHLY HOTEL OCCUPANCY RATE

Darwin Monthly Accommodation Report July 2023

Forward occupancy measures are slower than at the same time last year. Anecdotally booking lead times are shortening and bookings are also being impacted by increasing average room rates, rising costs of living pressures and increasing competition for discretionary spend from within and outside of the travel category.

FORWARD MONTHLY HOTEL OCCUPANCY

Looking ahead, there is significant capacity available right through the coming year.

FORWARD DAILY HOTEL OCCUPANCY AS AT 7 AUGUST 2023

July 2023

METHODOLOGY

The data in the hotel accommodation report is sourced from STR and is collected from a sample of 31 hotels with 10 or more rooms in Darwin*. Data is collected daily and collated to represent the industry and includes data for leisure, business and other purposes of travel. This sample represents 61% of the establishments in Darwin and 81% of the traditional accommodation room supply. STR defines a property (hotel) on the basis of three exclusionary criteria:

- 10 or more rooms;
- open to the public (excludes properties requiring membership, affiliation or club status);
- generates nightly revenue.

The short term letting data is sourced from the AirDNA platform. AirDNA collects data for 900 listed properties on either Airbnb and Vrbo in Darwin. Data from Airbnb and Vrbo is scraped daily and combined with data provided by partnered short term letting properties to provide a diversified data source and ensure an accurate representation of the short term letting market.

Tourism NT's research team collects detailed data on the accommodation metrics including demand, daily rates and RevPAR historical series for Darwin, Alice Springs and the Northern Territory. This information is available on request.
